The above system is NOT suitable for a rock band or other types of loud, live music. It is suited to playback and radiomic use.

Various playback options are available plus a small selection of microphones/stands. We do not have radio mics. Please get in touch to discuss your requirements.

FOH Multi run to down stage left – 50m, to upstage right – 80m.

Rear stalls mix position.

Power – 32a and 63a 1PN+E BS4343 located stage left.

None of the above power outlets has RCD protection. It is expected that these points will supply your power distribution containing RCD protection. If it is deemed that your distribution does not contain RCD protection, we will remove the supply. The venue will not be responsible any consequences that may result be it financial or otherwise for failure to comply.
